PABX 2 EXT.8 INT.LINES - FT208E

Telephone PABX with 2 trunk lines and 8 internal lines. Suitable for all types of telephones. With specific interfaces, the connection with intercom and the ID caller function are available. This PABX defines the connected terminal status: programming the telephones in different telephone and intercom operating modes, setting distinctive ringing, associating a direct internal number with each telephone set (DISA function), defining a terminal as "fax", follow me, call capture, 3-party conference. Two different general modes can be programmed (e.g. day and night). Provided with intercom interface for 4+1 audio systems. ID caller for all the users available. "Call diversion" function from intercom to external line. Other features: electrical power failure running, room monitor, activation of electrical equipment from remote telephone. Expandable through ES14E board. Intercom interface allows the connection to 4+1 and 1+1 systems. Product available until stock lasts.
