

HVR42/4
AHD/IP HYBRID DVR - HVR42/4

FUORI PRODUZIONE

4Ch AHD hybrid digital video recorder H.264 + 2 IP channels. Video output VGA and HDMI. Thanks to the possibility of handling 720p/1080p (full HD), 3 and 4MP AHD signals, analogue 960H and IP (1080p/3MP/4MP), it allows the progressive migration of an existing video surveillance system to a modern, high definition one. Otherwise, it can work even as a 6ch IP recorder (pure NVR). The recording can be done on Motion detection (for analogue/AHD channels) or continuously/scheduled mode with programmable overwriting. The internal storage allows a single Hard disk of up to 6TB (not included). The back-up can be done via frontal USB port or via network. The system can be even programmed remotely via browser and it allows also the connection to a Central Management Software of up to 128ch. Moreover, the P2P function support, allows to make easier the configuration for network connection vis Smart phone or tablet. Mouse and remote control included. Product not available any more.
