

Programming module Bluetooth -PGR2991BT

Programming module Bluetooth for Duo System bus. It can be directly connected to Duo bus and allows to programme all the devices in the installation through specific app "Duo System" available for Android smartphone. PGR2991BT and corresponding app are compatible even with all Duo products with internal firmware already supporting PGR2990. By updating the app, it will be possible to program - in an easy and quick way- next items of Duo System.
